The Restaurant Management system

A simple management system with great user experience for the Restaurants whowant to run their business individually

Personal Web Blog

During pandemic, I started to learn web development. I started my journey with Bootstrap as the front end framework and flask for the back end and for database connectivity, I used SQL Alchemy and apache server.

Eye-Blinking test, OpenCV

A group of 3 members made a software which will detect, when the eyes of the user (who's looking in the webcam) blinks. Team: 3 members (Published the Research Paper).

We used python libraries such as OpenCV, Tensorflow and pandas for this.
